Professional Summary

Full-Stack Software Engineer with **4+ years of experience** designing, building, and maintaining scalable, secure, and high-performance web applications. Specializes in frontend engineering with **React, Next.js, and Vue/Nuxt**, with strong full-stack capabilities across **Node.js, Express.js, REST APIs, PostgreSQL, and MongoDB**. Currently at **Xubitar** building eCommerce applications, **Shopify-based applications**, and inventory management systems. Proven ability to deliver production-grade systems, integrate third-party APIs, modernize legacy codebases, and uphold engineering best practices within agile teams.

Technical Skills

Frontend: React.js, Next.js, Vue.js, Nuxt.js, Astro.js, TailwindCSS, Shadcn UI, Vuetify
State Management: Redux, RTK Query, TanStack Query, Zustand, Pinia, Vuex
Backend & Database: Node.js, Express.js, REST APIs, Shopify Admin API, Storefront API, Webhooks, MongoDB (Mongoose), PostgreSQL (Prisma)
Languages & Tools: JavaScript (ES6+), TypeScript, Git, GitHub, Vite, ESLint, Prettier
Practices: Agile / Scrum, Code Review, SEO Optimization, SSR, i18n, AI-Assisted Development, Performance Optimization

Professional Experience

Full Stack Engineer — **Xubitar** *July 2026 – Present*

- Design, develop, and maintain production-grade eCommerce web applications using **React.js, Next.js, Express.js, Node.js, Prisma, and PostgreSQL.**
- Build and maintain Shopify-based eCommerce applications — Shopify apps using **Shopify Admin API, Storefront API, and webhooks.**
- Build inventory management systems with stock tracking, low-stock alerts, purchase/sales flows, and reporting.
- Build scalable backend services and RESTful APIs with a focus on performance, security, and maintainability.
- Own ongoing maintenance, bug fixes, and performance optimization for live eCommerce applications.
- Implement responsive, accessible, and high-performance user interfaces using modern React and Next.js best practices.

Software Engineer — **Developer eXperience Hub (Devxhub)** *Mar 2022 – Feb 2026*

- Designed, developed, and maintained production-grade web applications using **Nuxt.js, Next.js, React, Vue, and TypeScript.**
- Delivered user-facing features across Social Media Archiving System, Learning Management Systems (LMS), and eCommerce platforms.
- Implemented REST API integration in close collaboration with backend engineers, covering contracts, auth, error handling, and data fetching.
- Implemented scalable state management with **Redux, Pinia, and Vuex.**
- Built reusable components and maintained consistent UI/UX across platforms with **Tailwind CSS and Vuetify.**
- Built responsive, accessible, and SEO-optimized user interfaces with focus on Core Web Vitals and rendering performance.
- Improved performance and code quality through JavaScript ES6+ best practices, refactoring, and optimization.
- Collaborated in Agile workflows — stand-ups, sprint planning, and peer code reviews.

Projects

Social Media Archiving Platform | Nuxt.js, TailwindCSS, Pinia, Vuex, ApexChart

- Social media data archiving platform enabling secure backup of user data across **Facebook, Twitter, Gmail** and more.
- Built threat-detection alert system to proactively notify users of suspicious or potentially harmful account activity.

E Learning Platform | Nuxt.js, TailwindCSS, Pinia, i18n

- E-learning platform for mobile device servicing courses, providing structured curriculum, and downloadable resources.
- Implemented **single-device login enforcement** and secure payment system, modeled after Udemy's course delivery UX.

WiderML | Next.js, Konva, TanStack Query, Axios

- AI-powered platform that auto-generates websites, marketing content, and launch strategies to accelerate business go-to-market.
- Built interactive canvas editing with Konva and efficient server-state handling using TanStack Query and Axios.

Now Health — International Health Insurance | Next.js, i18n, TailwindCSS, Shadcn UI

- Multilingual global platform delivering localized health insurance services including consultancy, technology solutions, and third-party administration (TPA).
- Implemented i18n-based localization with responsive, accessible Shadcn UI and structured service/consultancy flows.

Digital Wallet | React.js, RTK Query, TypeScript, Express.js, MongoDB
- Secure digital wallet platform providing role-based dashboards for Users, Agents, and Admins with transaction validation and access control.
- Implemented JWT auth, PIN verification, fee/commission handling, and filterable transaction history.

Travel Buddy | Next.js, TypeScript, Express.js, PostgreSQL, Prisma
- Full-stack trip planning app with **JWT authentication**, role-based access control, protected routes, and SSR.
- Connects travelers to create/browse trip plans, find compatible partners, and share experiences.

Full-Stack Starter Templates | Next.js, Express.js, Prisma, JWT, RBAC
- Frontend: nextjs-starter-template | Backend: express-prisma. Live: nextjs-starter-mamun.vercel.app.
- Solves repetitive setup with preset auth + user management, role-based access, and production-ready tooling.

Education

B.Sc. in Computer Science & Engineering *2021*
Begum Rokeya University, Rangpur
